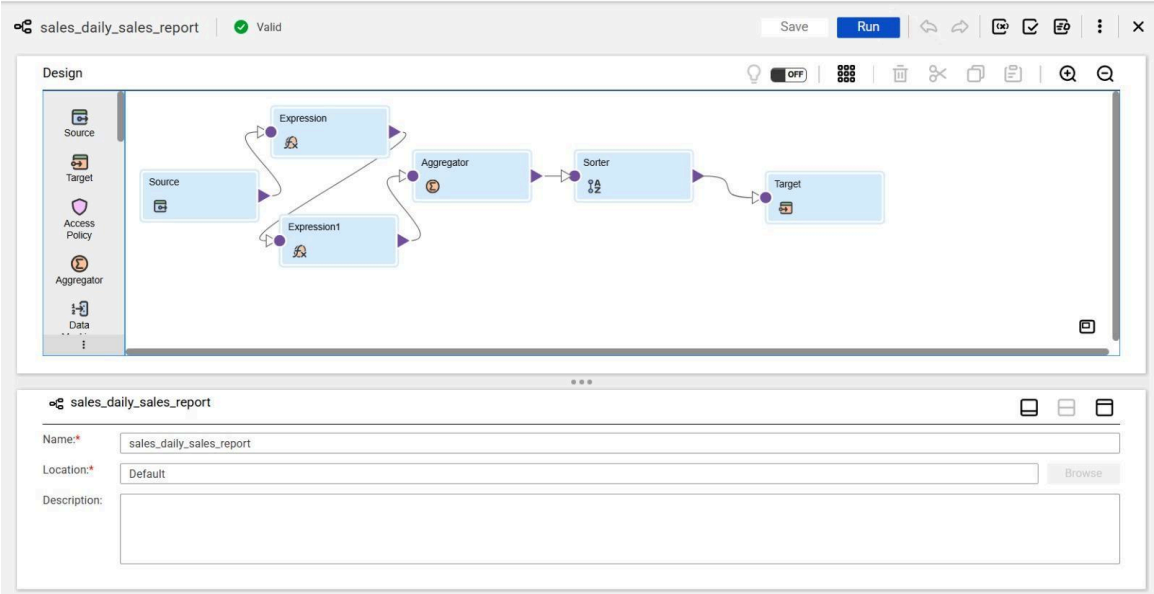
Task 2 – Daily Sales Summary Report (Informatica IICS)

Use Case

Daily Sales Summary Report based on TRANSACTION_DATE.



Expected Columns

TRANSACTION_DATE

TOTAL_TRANSACTIONS

TOTAL_QUANTITY

GROSS_SALES

TOTAL_DISCOUNTS

NET_SALES

AVG_TRANSACTION_VALUE

Mapping Flow

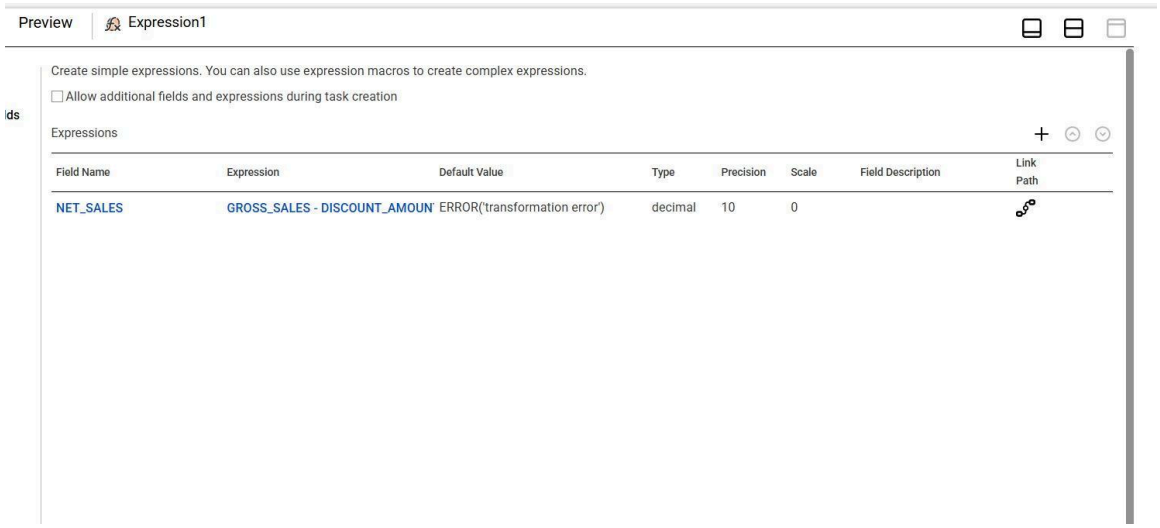
Source → Expression → Expression → Aggregator → Sorter → Target

Expression Logic

GROSS_SALES = TO_DECIMAL(QUANTITY) * TO_DECIMAL(UNIT_PRICE)

DISCOUNT_AMOUNT = (GROSS_SALES * TO_DECIMAL(DISCOUNT_PERCENT)) / 100

NET_SALES = GROSS_SALES - DISCOUNT_AMOUNT



Aggregator (Group By: TRANSACTION_DATE)

TOTAL_TRANSACTIONS = COUNT(TRANSACTION_ID)

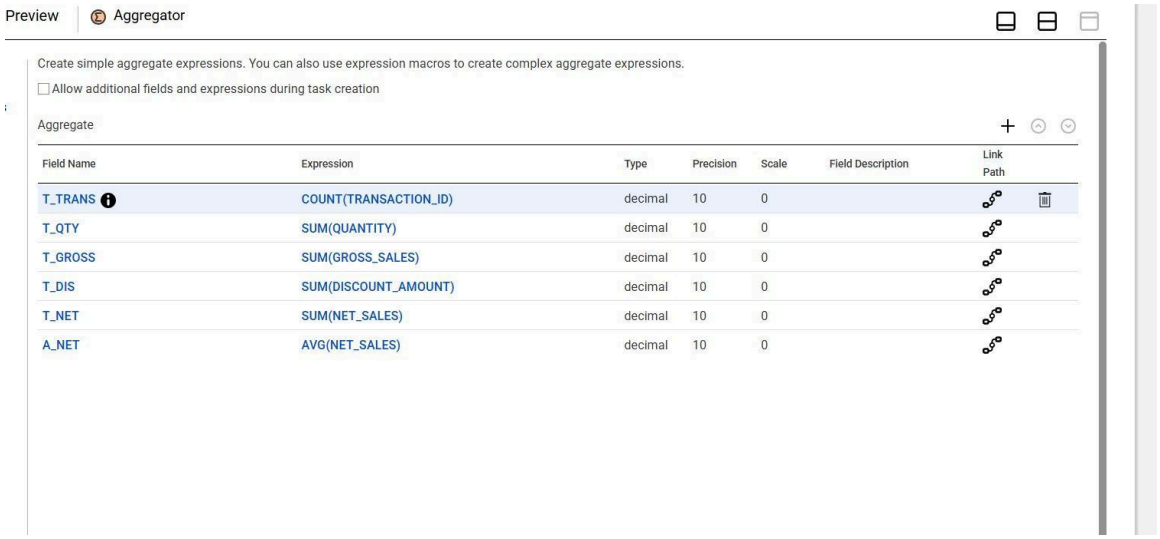
TOTAL_QUANTITY = SUM(QUANTITY)

GROSS_SALES = SUM(GROSS_SALES)

TOTAL_DISCOUNTS = SUM(DISCOUNT_AMOUNT)

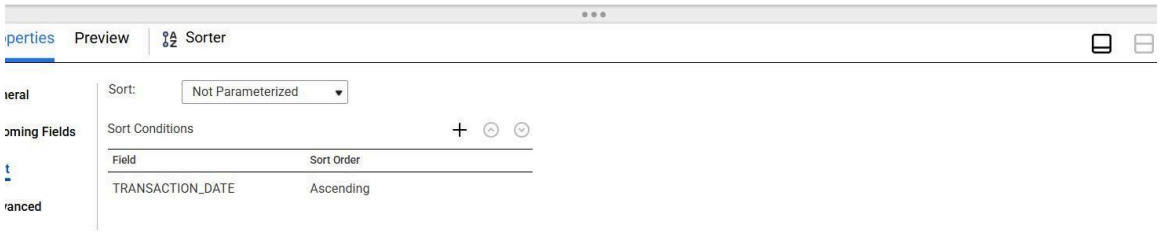
NET_SALES = SUM(NET_SALES)

AVG_TRANSACTION_VALUE = AVG(NET_SALES)



Sorter

TRANSACTION_DATE – Ascending

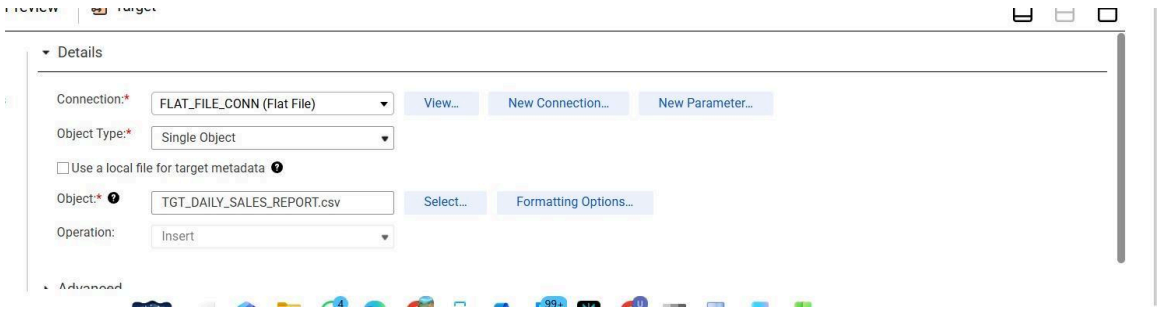


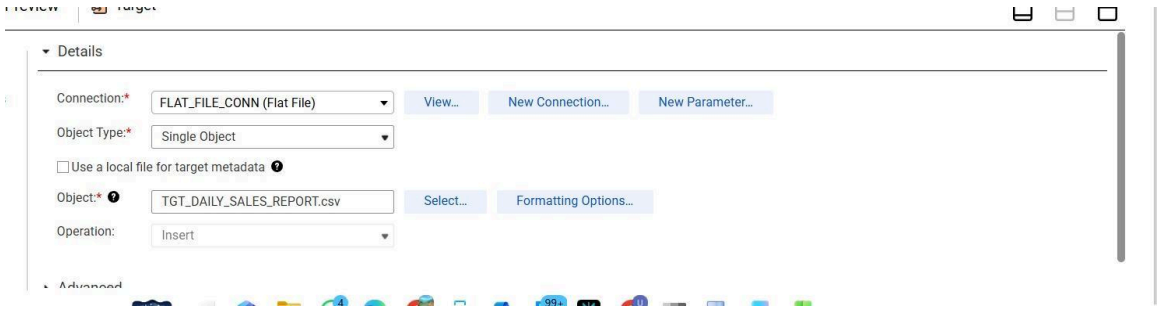
Target

TGT_DAILY_SALES_REPORT.csv

Operation: Insert

Screenshots





Interview Explanation

This mapping calculates Gross Sales, Discount and Net Sales using Expression transformation. Then Aggregator is used to generate daily summary by grouping on Transaction Date. Sorter is used to arrange data by date and finally data is loaded into the target file.
